FES Emergency Training Advisory Bulletin

Leading community safety
Protecting people & assets

Michael Poloni

Manager, IT & Emergency Training

COVID-19 (Coronavirus)

Fire Equipment Services is committed to community safety and protecting you and your assets as our highest priority. We are actively monitoring the COVID-19 (Coronavirus) situation, taking proactive steps and following official advice issued by the Victorian and Australian governments.

Emergency Management Training & Consultancy Services

The FES commitment to our clients is to deliver a professional and engaging experience, with practical and innovative approaches to course delivery and consultancy services. Our clients tell us that their learning experience is enhanced with our approach of utilising MFB operational firefighters to deliver these services. The technical expertise, skills and experience is highly sought after.

In light of recent developments with COVID-19, we have made the difficult decision to withdraw all MFB operational firefighters from delivery of courses and consultancy. This decision has been made to prioritise the availability of our emergency services personnel during the COVID-19 pandemic.

All training courses and consultancy services are now suspended.

We know this will cause some disruption for our clients. As this is a rapidly changing environment, we will continue to work with government and other stakeholders, and plan for the eventual resumption of regular training delivery.

If you have any questions or concerns about FES delivery of training courses, please contact our training department on 1300-855-163 or by email at training@fes.com.au

Kind regards,

Michael Poloni
Manager, IT & Emergency Training
